Education

University of Waterloo

Sept 2023 – May 2028

BMath in Financial Analysis and Risk Management, Computing Minor, Co-op

Experience

Bank of Montreal - Private Banking Services - GIC Intern, – Beijing, China

Sept 2025 - Dec 2025

- Handled **300+ client communications** on Guaranteed Investment Certificate (GIC) services, providing professional explanations and practical solutions by phone and in person.
- Processed **100+ student GIC and bank account applications**, following up with clients and internal teams to ensure requests were completed accurately and on time.
- Generated and validated **daily GIC application reports** by refreshing Excel templates linked to master application CSV files, summarizing new and updated applications for tracking and follow-up management.

Bank of Montreal - Private Banking Services - PBS Intern, – Beijing, China

Apr 2025 - Aug 2025

- Guided **100+ cross-border clients** through BMO's Asian Referral Program, explaining account-opening procedures and connecting clients with appropriate Canadian branches.
- Coordinated with **PBS Relationship Managers and Canadian branches** to resolve documentation and special account-opening issues, helping streamline onboarding.
- Managed high-volume client emails and hotline calls in **English and Mandarin**, delivering clear explanations and maintaining a strong client experience.
- Developed a **VBA automation tool** in Excel to import customer data from CSV files, auto-fill service forms, and generate personalized client emails, reducing manual data entry and improving processing accuracy.

Dundas Life - AI Generated Content Creation and Optimization, – Remote

Oct 2024 – Dec 2024

- Applied SEO principles and AI tools, including ChatGPT and OpenAI, to optimize website content for search visibility, readability, and keyword alignment.
- Generated, edited, and audited **50+ blog posts and content pieces** using AI-assisted workflows while aligning content with SEO best practices and brand guidelines.

Projects

Credit Risk Analytics Dashboard and Classification Project

Python, Power BI, pandas, scikit-learn

- Analyzed **1,000 German credit applicants** using Python to identify default-risk patterns across loan amount, loan duration, checking account status, savings level, and credit history.
- Built an **interactive Power BI dashboard** with KPI cards, slicers, and risk segmentation visuals to monitor default rate, loan exposure, and applicant risk profiles.
- Translated analytical findings into business insights on liquidity risk, savings levels, loan exposure, and false-negative risk to support credit risk decision-making.
