Experience

Bank of Montreal - Private Banking Services - GIC Intern – Beijing, China Sept 2025 - Dec 2025

- Generated and validated daily GIC application reports using Excel templates linked to master CSV files, helping track new applications, status updates, and follow-up priorities.
- Processed **100+ student GIC and bank account applications**, reviewing application details and coordinating with clients and internal teams to support accurate and timely completion.
- Handled **300+ client communications** on GIC procedures, required documents, account-opening steps, and follow-up requirements in line with banking documentation workflows.

Bank of Montreal - Private Banking Services - PBS Intern – Beijing, China Apr 2025 - Aug 2025

- Developed an Excel VBA automation tool to import customer data, auto-fill service forms, and generate personalized client emails, reducing repetitive manual data entry by approximately **2–4 hours per week**.
- Supported BMO's Asian Referral Program by guiding **100+ cross-border clients** through account-opening procedures and coordinating with Relationship Managers and Canadian branches.
- Managed high-volume English and Mandarin emails/calls to explain banking procedures, KYC-related documentation requirements, application status, and resolve onboarding issues.

Projects

Credit Risk Analytics Dashboard and Classification Project *Python, Power BI, pandas, scikit-learn*

- Analyzed **1,000 German credit applicants** to identify default-risk patterns across loan amount, duration, account status, savings level, and credit history.
- Built an interactive Power BI dashboard with KPI cards, slicers, and risk segmentation visuals to monitor default rate, loan exposure, and applicant risk profiles.
- Compared Logistic Regression and Random Forest models using recall, ROC-AUC, and cost-sensitive evaluation, selecting Logistic Regression for stronger high-risk applicant identification.

Loan Portfolio Risk and Profitability Dashboard *Excel, PivotTables, dashboards, advanced formulas*

- Built an interactive Excel dashboard using Pivot Tables, Pivot Charts, slicers, and advanced formulas to analyze 614 loan applications by approval rate, risk tier, expected loss, and net profit.
- Developed risk-tier logic using credit history and debt-to-income ratio to classify applicants into low, medium, and high-risk segments.
- Calculated interest revenue, expected loss, and net profitability to support portfolio risk analysis and lending decisions.

Skills

Programming: Python, SQL, VBA, R

Data & Analytics: Excel (PivotTables, dashboards, advanced formulas), Power BI, pandas, scikit-learn

Tools: VS Code, Git, Linux

Education

University of Waterloo Sept 2023 – May 2028

BMath in Financial Analysis and Risk Management, Computing Minor, Co-op
